

FENG GUO

VIRTUAL INTEGRATION / AUTOMOTIVE DEVELOPMENT / AI

China and Germany | German national
+86 166 000 27797 | Guo.Feng@outlook.de

EXECUTIVE PROFILE

Head of Virtual Integration at CARIAD China with 12+ years across Germany and China in automotive software development, system architecture, AI applications and E/E integration. Leads teams developing virtual integration capabilities, simulation environments, LabCar systems and data platforms that bring vehicle functions together earlier in the development cycle. Combines technical depth with organization leadership and cross-border engineering delivery.

12+

YEARS IN AUTOMOTIVE R&D

15 + 30

DIRECT + EXTERNAL ENGINEERS

UP TO 400%

WORKFLOW EFFICIENCY GAIN*

* Selected autonomous-driving localization and integration-testing workflows.

LEADERSHIP IMPACT

- Built and expanded a 45-person engineering organization developing virtual integration, AI/data toolchains, LabCar systems, ADAS simulation and automation capabilities.
- Connected AI, big data and automation to engineering bottlenecks, delivering up to 400% efficiency improvement in selected AD localization and integration-testing workflows.
- Aligned software, system architecture and vehicle teams across China and Germany, translating local development needs into scalable engineering solutions.

PROFESSIONAL EXPERIENCE

Head of Virtual Integration | Current title

CARIAD 2021 - PRESENT

CARIAD China, Volkswagen Group | Beijing, China

- Lead development of virtual integration capabilities spanning E/E systems, LabCar environments, ADAS simulation, OTA integration and cloud data closed-loop platforms.
- Set technical priorities for 15 direct reports and 30 external engineers; expanded the organization's remit from simulation and automation into AI/data-driven integration and LabCar development.
- Directed development of sensor models, data-injection models and engineering toolchains that support earlier integration of ADAS and HMI functions.
- Connect AI and data methods with practical development workflows, platform selection and adoption across China and global engineering teams.

EARLIER EXPERIENCE

Group Lead | Test & Integration House HCP2, ADAS

APR 2018 – DEC 2020

Continental AG | Lindau & Frankfurt, Germany

- Led customer-facing ADAS system integration and validation across SiL, MiL, HiL and vehicle environments.
- Set test strategies, validation milestones and delivery plans with customers; presented progress, quality risks and escalations in steering boards.
- Acted as first escalation level for integration and test topics, coordinating software development, system and vehicle teams.

Virtual Development Expert / System Architect

MAR 2014 – MAR 2018

Automotive Safety Technologies GmbH, AUDI subsidiary | Gaimersheim, Germany

- Product Owner for a virtual-development platform; coordinated 15 developers building simulation and test-system capabilities.
- Designed virtual-development and test-system architectures for Audi autonomous-driving and software-validation programs.
- Prototyped a reinforcement-learning platform for function development; researched sensor models, deep learning and reinforcement learning.

TECHNICAL AND STRATEGIC EXPERTISE

Vehicle software & systems

E/E and whole-vehicle integration; automotive software development; ADAS functions; OTA; LabCar and SiL/MiL/HiL environments.

Virtual development platforms

Simulation architecture; vECU/VFB and whole-vehicle virtualization concepts; sensor and data-injection models; cloud data closed loops.

AI in engineering

Applied AI and GenAI/LLM evaluation for development workflows and engineering efficiency; earlier deep-learning and reinforcement-learning work.

International leadership

Department ownership, technical roadmaps, stakeholder alignment, supplier/customer interfaces and Germany-China execution.

EDUCATION AND CREDENTIALS

Diplom-Informatiker (equivalent to Master of Computer Science) | University of Bonn, Germany | 2004–2012

Focus: Artificial Intelligence and Software Engineering. Thesis: simulation of human attention using symmetry and contrast features.

VW Group Worldwide Leadership License / ACL Certificate
